

GROW

During two GreenCamps in Bulgaria (2023) and Germany (2024), young people have collected several demands for policymakers to create a better tomorrow.

1.

Fighting Climate Change: Implement measures to reduce global warming and promote sustainable practices.

2.

Waste Separation: Introduce effective systems for waste separation to encourage recycling and minimize waste.

3.

Protecting Water: Develop strategies to conserve water resources and protect water bodies from pollution.

4.

Experiencing Nature: Create and promote access to natural spaces to raise awareness about the environment.

5.

Car-Free Cities: Design cities to be free of cars to improve air quality and reduce traffic.

6.

Filling Streets with Life: Actively design public spaces to promote social interactions and strengthen community spirit.

7.

Fighting Fast Fashion: Support initiatives that promote sustainable fashion and reduce the excessive consumption of fast fashion.

8.

Promoting Collaboration: Strengthen partnerships among various stakeholders (governments, businesses, NGOs).

9.

Combating Greenwashing: Demand transparent communication from companies to prevent misleading claims.

10.

Against the Commercialization of Green Politics: Ensure that environmental policies are not dominated by economic interests.
